

Kansas Technology Student Association Volunteer and Judge Information

Technology Student Association (TSA) is a student-led career and technical student organization for both middle school and high school students. We focus on training students in STEM fields through career exploratory competitions. Examples of events that students can compete in range from software design, electrical applications, and flight design to prepared presentation, career challenge, and future technology teacher. While all of the competitive events have a STEM focus, many do not require specific knowledge of a subject, such as Prepared Speech.

The judging for the state conference takes place in two parts.

Portfolio judging will happen virtually between **March 13th-24th**.

In-person competition will happen **March 27th-29th** in Salina, KS, at Webster Conference Center.

If you would like to help with the virtual competition judging, please sign-up here: [Virtual Early Judging](#)

If you would like to help with the in person competition judging, please sign-up here: [On-Site Judging](#)

Additional Information about TSA is found on the National TSA website (www.tsaweb.org) or Kansas TSA website (www.kansastsaweb.org)

Please direct questions to Allison (Young) Bockenstedt, Kansas TSA Judges and Event Coordinator or State Advisor, Ruth DeLange.
