TSA Creed

I believe that Technology Education holds an important place in my life in the technical world.

I believe there is a need for the development of good attitudes concerning work, tools, materials, experimentation and processes of industry.

Guided by my teachers, artisans from industry, and my own initiative, I will strive to do my best in making my school, community, state, and nation better places in which to live.

I will accept the responsibilities that are mine.
I will accept the theories that are supported by proper
evidence. I will explore on my own for safer, more
effective methods of working and living.

I will strive to develop a cooperative attitude and will
exercise tact and respect for other individuals.

Through the work of my hands and mind, I will express
my ideas to the best of my ability.

I will make it my goal to do better each day the task
before me, and to be steadfast in my belief in my God,
and my fellow Americans.
